

Viet-Hoa Khuat

Senior Android Developer

ABOUT

I was born in a poor rural area of Binh Phuoc province. After high school, it took me a lot of time to find what I want to do and what I belongs to. Now I choose to become a good engineer as my life purpose. To become a good engineer, I know nobody can't help me, nobody can't do it for me, I need to do by myself and.. no one can stop me. I start developing projects with heart, applying information technology to help people solve real life problems to be more successful.
